## SUMMARY

Backend-oriented Full-Stack Developer with ~8 months of experience building scalable APIs and real-world SaaS platforms. Skilled in Java (Spring Boot), Python (Django, FastAPI), and modern backend systems including async processing, API integrations, and multi-tenant architectures. Experienced in working with databases, authentication systems, and third-party services (payments, AI APIs). Leveraged AI-assisted development to improve development speed and code quality. Strong focus on clean architecture, performance, and reliable system design.

## SKILLS

Backend: Java, Spring Boot, Python, Django, FastAPI, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Async & Systems: Redis, Celery, Background Jobs, WebSockets

Authentication & Security: JWT, Role-Based Access Control (RBAC)

Frontend: Vue.js, React.js

Tools & DevOps: Git, GitHub, Bitbucket

Integrations: Razorpay, AWS S3

## EXPERIENCE

### Gimbooks India

Oct 2025 – Present

#### GimBooks — GST & Fintech SaaS Platform

- Developed and maintained **backend services using Django REST Framework** & frontend using Vue.js for a multi-tenant B2B SaaS platform supporting GST invoicing, accounting, and compliance workflows.
- Created end to end version-2 to delivery challan module, export invoice module, prefix management (frontend & backend both).
- Cleared ~85% user issue [web].
- Reduced (optimization) 40% unwanted and multiple API calls in frontend.
- Optimized download invoice API and lists API which were commonly used.

#### Picsera — Creative Platform

- Picsera is platform where user can download template and generate custom video template for them.
- Built FastAPI backend services for templates and auto generate video.
- Designed MongoDB schemas using Beanie.
- Integrated auto generated video template using n.
- Created Picsera web end to end with API integration.
- Integrated Razorpay payment method.

#### Java Developer Intern

Completed a Java Developer internship at EazyByts, working on backend development with Java and Spring Boot. Built 10+ RESTful APIs with Spring Boot, implemented JWT-based authentication, improving security by 30%, and debugging code for scalability. Collaborated in SDLC workflows, participated in code reviews, and enhanced my skills in enterprise application development and Git-based version control. Applied software engineering best practices such as modular design, code reviews, and unit testing—to reduce bugs 30% across backend modules so that we can build scalable and high-performance website.

## PROJECTS

### Car Rental System (Full stack Java project with spring security) [GitHub](#)

- Includes user authentication & Authorization.
- Users can select location, date, and fuel type and book their car accordingly.
- Tech Stack: Java, Spring Boot, Spring Security, Hibernate, React.js.

## EDUCATION

### Bachelor of Technology in Computer Science (August 2021 - May 2025)

Shri Shankaracharya Technical Campus, Bhilai, Chhattisgarh

CGPA: 8.7/10

### Higher Secondary Education (Class XII) (June 2019 - May 2021)

Ryan International School, Raipur, Chhattisgarh

### Secondary Education (Class X) (June 2018 - May 2019)

St. Xavier's High School, Raipur, Chhattisgarh

## ACHIEVEMENTS

Winner of HackBio college hackathon.

Postman API Fundamentals Student Expert Certification.

Oracle Data Platform 2025 Certified Foundations Associate Link

## CORE STRENGTHS

- Willingness to learn
- Strong adaptability and teamwork skills & can take up additional responsibilities.
- Demonstrates consistency in work.
